PROFESSIONAL EXPERIENCE

SDET I | Sun Life Global Solutions | Bengaluru, India (Hybrid) | Jan 2023 - Present

- Developed and maintain Playwright (Python) automated tests for UI and API validation across an enterprise AI chat assistant.
- Designed REST API validation workflows, improving response reliability and contributing to an approximately 30% reduction in critical defects.
- Enabled AWS-based parallel test execution, reducing regression cycle time by approximately 40%.
- Contributed to Quality Engineering for a large-scale modernization program covering 140+ legacy applications.
- Automated 400+ regression test cases using Tricentis Tosca, improving coverage across multiple enterprise systems.

SDE - Testing | myclassroom | Noida, India (Remote) | Jun 2022 - Dec 2022

- Tested web and mobile applications and designed functional/end-to-end scenarios across learning modules, assessments, content access, performance tracking, and critical release workflows.
- Built Selenium WebDriver automation in Java with Cucumber BDD for critical regression coverage and collaborated with product and development teams in Agile sprints.

Software Tester | Anthem | Chennai, India (Remote) | Nov 2021 - Jun 2022

- Executed functional, UI, and end-to-end testing for web and mobile applications in an Agile environment, supporting stable production releases.
- Built Selenium WebDriver (Java) smoke automation and collaborated with Business Analysts and UI/UX teams on test planning, coverage, defect tracking, and release reporting.

Associate | Cognizant Technology Solutions | Chennai, India (Onsite) | May 2018 - Nov 2021

- Performed functional and automated testing across retail and e-commerce applications, including order placement and end-to-end customer journeys.
- Built Selenium WebDriver (Java) regression automation and worked with distributed teams on test strategy, planning, defect tracking, and Agile release validation.

PROJECTS

Project 1: Playwright Pytest E2E Framework | Python, Playwright, Pytest

- Scalable end-to-end test automation framework combining UI and API testing with Page Object Model design, API-driven test data setup, and centralized configuration for multi-environment runs.

Project 2: SDET Skills | AI Agent Skills, Python, ISTQB Standards

- Published collection of reusable AI agent skills for QA engineers, covering automation test creation, test review, bug reporting, and requirements analysis - installable via skills.sh across 38+ AI coding agents.
