

BALAJI

Software Development Engineer in Test

Bengaluru, India • balaah16@gmail.com • +91 8870614654 • [LinkedIn](#) • [GitHub](#)

SUMMARY

Software Development Engineer in Test with 7+ years of experience building scalable automation frameworks and reliable systems. Skilled in Python, APIs, SQL, and AWS, driving improvements in test coverage, performance, and CI/CD efficiency.

EXPERIENCE

SDET I

Sun Life Global Solutions

Jan 2023 - Present

Bengaluru, India (Hybrid)

- Built Playwright (Python) automation framework for UI and API testing across an enterprise AI chat assistant.
- Designed API validation workflows, improving response reliability, and reducing critical defects (~30%).
- Enabled AWS-based parallel test execution, reducing regression cycle time (~40%).
- Contributed to testing for a large-scale modernization program covering 140+ legacy applications.
- Automated 400+ test cases using Tosca Commander, improving regression coverage across multiple systems.
- Developed Java utilities: AutoLogValidation (log parsing, error reports) and AutoMailTrigger (automated failure alerts).

SDE - Testing

myclassroom

Jun 2022 - Dec 2022

Noida, India (Remote)

- Tested web and mobile applications for an ed-tech platform supporting JEE/NEET preparation, ensuring stability across multiple user workflows.
- Designed and executed functional test scenarios covering core learning modules, improving functional reliability before releases.
- Built automation scripts using Selenium WebDriver (Java) with Cucumber BDD, enabling regression testing for critical features.
- Collaborated with developers and product teams in Agile sprints to validate requirements and ensure high-quality feature delivery.
- Performed end-to-end validation across student journeys including content access, assessments, and performance tracking.

Software Tester

Anthem

Nov 2021 - Jun 2022

Chennai, India (Remote)

- Tested web and mobile applications in an Agile environment, ensuring stable and high-quality releases across features.
- Designed and executed test scenarios across functional and UI workflows, strengthening overall application reliability.
- Collaborated closely with Business Analysts and UI/UX teams to translate requirements into effective test coverage.
- Built Selenium WebDriver (Java) automation scripts for smoke testing, enabling faster validation of critical paths.
- Contributed to test planning, execution, and reporting, ensuring clear visibility of quality metrics during releases.

Associate

Cognizant Technology Solutions

May 2018 - Nov 2021

Chennai, India (Onsite)

- Tested web and mobile applications across retail and e-commerce domains, ensuring stable and high-quality releases.
- Executed functional and automated tests for end-to-end workflows, covering order placement and customer journeys.
- Built automation scripts using Selenium WebDriver (Java) for critical scenarios, improving regression efficiency.
- Collaborated with distributed teams and onsite stakeholders to align test strategy, planning, and release validation.
- Performed test design, execution, and defect tracking within Agile environments, ensuring consistent delivery quality.

EDUCATION

Anand Institute of Higher Technology

B.E, Electronics and Communication Engineering.

July 2013 - May 2017

Chennai, India

SKILLS

Languages: Python, Java, SQL.

Automation: Playwright, Selenium WebDriver, API Testing, Cucumber BDD, Tricentis Tosca.

Cloud & DevOps: AWS, CI/CD, Git, Docker.

AI & Modern Testing: Prompt Engineering, AI-assisted Testing, LLM Evaluation, RAG-based Testing.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Certified Tester Foundation Level
- SAFe Agile Practitioner
